

INVITATION

NORDIC HEAT ACADEMY

THE POLITICAL & FINANCIAL CASE FOR DISTRICT ENERGY & ENERGY FROM WASTE

SEMINAR HIGHLIGHTING POLITICAL AND FINANCIAL STRATEGIES
SUPPORTING INVESTMENTS IN SMART ENERGY SYSTEMS

HELSINGBORG – 19 APRIL 2018

YOU ARE INVITED to an international energy workshop in Helsingborg involving political decision makers on local and national level, as well as senior managers within public energy operators, financial institutions and investors, and representatives from the wider supply chain. **The conversation will specifically address significant investment programmes in smart energy systems for the future currently underway in Stoke-on-Trent, North-East Lincolnshire and Helsingborg.**

THE OBJECTIVE is to share practical experiences and examples of best practice in national and local political strategies to facilitate and accelerate the implementation of heat networks, Energy-from-Waste installations, and other sustainable energy solutions. The aim is also to establish an understanding of investor strategies and what it takes to attract and involve public and private financial institutions in smart energy programmes.

FOCUS - Topics addressed at the session include;

- Political and financial opportunities in investments in smart energy systems
- The wider story – experiences from investments in other energy and infrastructure programmes – cases from SE and UK
- The political case – drivers, challenges, strategies on local and national level
- The financial case – optional strategies and examples on relevant cases
- Involving the wider supply chain – bundled solutions
- From words to action – how to get things moving

NORDIC HEAT – Training & Advisory Services in District Energy

Nordic Heat was founded in 2014 by a group of municipality owned energy operators in Sweden, all with over 50 years of experience in installing and operating profitable district energy schemes in a deregulated energy market. The mission is to provide peer-to-peer assistance to new entrants in the process of installing competitive, reliable and sustainable district energy and Energy-from-Waste solutions. Since the start some 3000 professionals in 8 markets have taken part in the training and advisory services offered by Nordic Heat.
